

# STUDENT REPORT

## DETAILS

Name

Md Imran Mohsin

Roll Number

22B124EE408-T

## EXPERIMENT

Title

SPACE COUNTER

Description

You have been given the task of making the content on a social media platform more user-friendly. Your task is to find and return an integer value representing the count of the number of spaces in a given string S.

Input:

A string S

Output :

Return an integer value representing the count of the number of spaces in a given string S.

Example:

Input:

Hello World Hey

Output:

2

Source Code:

```
def count_spaces(s):  
    # Count the number of spaces in the string  
    space_count = s.count(' ')  
    return space_count  
  
# Input reading  
s = input().strip() # Read input string and remove any surrounding whitespace  
  
# Calculate and print the result  
result = count_spaces(s)  
print(result)
```
